

Shidler College of Business
University of Hawai'i at Manoa
Summer 2020

Bus 313 – Economic & Financial Environment of Global Business

Instructor: Alex Hittle
Office Hours: By Arrangement
E-mail: aahittle@hawaii.edu

MTWRF: 10:30-11:45 am
Location: Zoom!

Course Description:

BUS 313 – The Economic & Financial Environment of Global Business introduces students to the theory of trade and international finance. Using that theoretical foundation, the course will examine a number of key global regions and particular case studies.

The objective of the course is to:

1. Review how we got here.
2. Discuss where we are now (i.e. what does 'here' look like)
3. Consider what the future holds during your career span
4. Give you the language and tools to make that analysis

Textbook:

International Economics, 7th Edition, James Gerber, Pearson. This is offered as part of the IDAP program, so you will automatically buy an electronic version of the book as part of your course registration. However, you can opt out if you wish. You may be able to find a used version of the physical textbook at a reasonable price on line. Given how quickly this summer course goes, my advice is to use the online textbook, unless you can obtain a hard copy before the end of the first week. Make a habit of reading through the pages that are assigned in connection with the lectures.

Grading Structure:

Midterm one:	15%
Midterm two:	15%
Issue Briefing:	20%
Attendance/Participation:	30%
Oral Final:	20%

The **midterms** will be on the material from the topics presented in Part I and then Part II of the course. They will include quantitative problems with point answers as well as short answer problems. They will be curved at my discretion.

The **issue briefing** will require the student to make a concise oral background presentation to the class (2-3 minutes) and a short (1-2 page) written briefing document. It is meant to simulate the sort of work one would do in a business/government environment. Ideally, the written briefing could serve as writing sample in a job application.

I believe that **attendance/participation** is important. This class has been adapted from what was a traditional lecture course – and I expect you to treat it like one.

- I ask you to make a good faith effort to participate in the class in real time via Zoom. I will record each class and put a recording up on YouTube, but those recordings are primarily for studying or unavoidable absences. *If you are going to be absent from the real time class please e-mail me ahead of time, just like a regular course.*
 - I realize some students may be in inconvenient time zones or may have regular commitments that they need to work around. If so, contact me and we can come up with an appropriate special arrangement.
- During class I will select student's names at random and ask questions. I will expect you to reply within about 10 seconds or so. (Hitting the space bar while on Zoom will unmute your microphone). In other words, I want you to watch the lectures in a constant state of readiness. I will track performance on these questions – not by whether or not you got them right, but whether or not you replied. You will likely be called on several times during the course, so don't obsess if you miss a question.
- I will assign short practice problem sets/tasks several times a week. Often I will start class off by asking individual students what answers they got. Again, a prompt, prepared, crisp answer is what I am looking for.
- Finally, some of these short assignments may ask that you turn in work. This will also figure into your attendance/participation grade.

The **oral final** will consist of a 15 minute Zoom chat with me. I will ask questions about all aspects of the course to see if you can speak easily about them. I believe this is a useful tool to assess performance.

Academic Dishonesty:

It is not worth it! It is much easier to simply learn the material rather than cheat. So don't do it. Instances of academic dishonesty, as defined by the University Student Conduct Code:

(http://www.studentaffairs.manoa.hawaii.edu/policies/conduct_code/) will not be tolerated and may result in a grade of "F".

Bus 313 – Economic & Financial Environment of Global Business

<i>PART 1: Introduction and the Microeconomic Analysis of Trade</i>			
Class	Date:	Topic(s):	Reading:
1	7/6	<i>Introduction:</i> <ul style="list-style-type: none"> - Course structure - Main themes – 4 themes to play out during your workspan 	None
